1994-96 MAINTENANCE Volvo Maintenance & Service Intervals - Turbo

1994-96 850 Turbo Sedan

1995-96 850 T-5R Turbo Sedan

1994-96 850 Turbo Sportswagon

1995-96 850 T-5R Turbo Sportswagon

* PLEASE READ THIS FIRST *

NOTE:

All SERVICE SCHEDULES are listed for normal service vehicles. If vehicle is operated under severe service conditions, see SEVERE SERVICE REQUIREMENTS (PERFORM W/SERVICE SCHEDULES) for items requiring additional maintenance.

NOTE:

This article contains scheduled maintenance service information. Fluid types and capacities listed with each service in this article are only those necessary to perform that scheduled service. For specifications pertaining to fluid capacities for the entire vehicle, fuse and circuit breaker identification, wheel and tire size, battery type, warranty information, or model identification refer to the MAINTENANCE INFORMATION article in this section.

CAUTIONS & WARNINGS

SUPPLEMENTAL RESTRAINT SYSTEM (AIR BAG)

NOTE: See the AIR BAGS article in the ACCESSORIES/SAFETY EQUIPMENT Section.

Modifications or improper maintenance, including incorrect removal and installation of the Supplemental Restraint System (SRS), can adversely affect system performance. DO NOT cover, obstruct or change the steering wheel horn pad in any way, as such action could cause improper function of the system. Use only plain water when cleaning the horn pad. Solvents or cleaners could adversely affect the air bag cover and cause improper deployment of the system.

WARNING: To avoid injury from accidental air bag deployment, read and carefully follow all warnings and service precautions. See appropriate AIR BAGS article in ACCESSORIES/SAFETY EQUIPMENT.

CAUTION: Disconnect negative battery cable before servicing any air bag system, steering column or passenger side dash component. After any repair, turn ignition key to the ON position from passenger's side of vehicle in case of accidental air bag inflation

SUPPLEMENTAL RESTRAINT SYSTEM (SRS) AIR BAR WARNING

NOTE: For information on air bag DIAGNOSIS & TESTING or DISPOSAL PROCEDURES, see AIR BAGS article in the ACCESSORIES/SAFETY EQUIPMENT Section.

System circuit is grounded by 2 screws beneath the driver's seat. DO NOT use these screws to ground any other accessory. DO NOT $\,$

ground any other components near this system.

SIDE IMPACT PROTECTION SYSTEM (SIPS) - 1995-96 MODELS

NOTE: For information on air bag DIAGNOSIS & TESTING or DISPOSAL PROCEDURES, see AIR BAGS article in the ACCESSORIES/SAFETY EQUIPMENT Section.

AIR CONDITIONING SERVICING

CAUTION: Avoid breathing R-134a refrigerant and PAG lubricant vapors, exposure may irritate eyes, nose and throat. To remove R-134a from system use R-134a recycling equipment that meets SAE J2210 specifications. If accidental system discharge occurs, ventilate work area before resuming service.

WARNING: R-134a service equipment or vehicle A/C systems SHOULD NOT be pressure tested or leak tested with compressed air. Some mixtures of air/R134a have shown to be combustible at elevated pressures. These mixtures are dangerous and may cause fire and/or explosions. See AIR CONDITIONING SERVICE article in GENERAL INFORMATION section.

ANTI-LOCK BRAKE SYSTEM

The anti-lock brake system contains electronic equipment that can be susceptible to interference caused by improperly installed or high output radio transmitting equipment. Since this interference could cause the possible loss of the anti-lock braking capability, such equipment should be installed by qualified professionals.

On models equipped with anti-lock brake systems, ALWAYS observe the following cautions:

- * DO NOT attempt to bleed hydraulic system without first referring to the appropriate ANTI-LOCK BRAKE SYSTEM article in the BRAKES Section.
- * DO NOT mix tire sizes. As long as tires remain close to the original diameter, increasing the width is acceptable. Rolling diameter must be identical for all 4 tires. Some manufacturers recommend tires of the same brand, style and type. Failure to follow this precaution may cause inaccurate wheel speed readings.
- * Use ONLY recommended brake fluids. DO NOT use silicone brake fluids in an ABS-equipped vehicle.

BATTERY WARNING

WARNING: When battery is disconnected, vehicles equipped with computers may lose memory data. When battery power is restored, driveability problems may exist on some vehicles. These vehicles may require a relearn procedure. See COMPUTER RELEARN PROCEDURES article in GENERAL INFORMATION section.

REPLACING BLOWN FUSES

Before replacing a blown fuse, remove ignition key, turn off all lights and accessories to avoid damaging the electrical system. Be sure to use fuse with the correct indicated amperage rating. The use of an incorrect amperage rating fuse may result in a dangerous electrical system overload.

BRAKE SYSTEM

CAUTION: If brake warning light comes on while driving it indicates a low fluid level or failure in one of the braking circuits. If the brake pedal can be depressed further than normal it is an indication that one of the brake circuits is not functioning. Stop vehicle and check brake reservoir fluid level. If level is below MIN mark, DO NOT drive vehicle. Have it towed to a repair shop. If level is between the MIN and MAX marks, proceed cautiously to a repair shop.

BRAKE PAD WEAR INDICATOR

Indicator will cause a squealing or scraping noise, warning that brake pads need replacement.

CATALYTIC CONVERTER

Continued operation of vehicle with a severe malfunction could cause converter to overheat, resulting in possible damage to converter and vehicle.

Any modification to the exhaust system on turbo models, which reduces exhaust backpressure, will lead to lean fuel mixtures and excessive spark advance. This could cause serious engine damage.

ELECTROSTATIC DISCHARGE SENSITIVE (ESD) PARTS

WARNING: Many solid state electrical components can be damaged by static electricity (ESD). Some will display a warning label, but many will not. Discharge personal static electricity by touching a metal ground point on the vehicle prior to servicing any ESD sensitive component.

ENGINE OIL

CAUTION: Never use non-detergent or straight mineral oil.

FUEL SYSTEM SERVICE

WARNING: Relieve fuel system pressure prior to servicing any fuel system component (fuel injection models).

HALOGEN BULBS

Halogen bulbs contain pressurized gas which may explode if overheated. DO NOT touch glass portion of bulb with bare hands. Eye protection should be worn when handling or working around halogen bulbs.

RADIATOR CAP

CAUTION: Always disconnect the fan motor when working near the radiator fan. The fan is temperature controlled and could start at any time even when the ignition key is in the OFF position. DO NOT loosen or remove radiator cap when cooling system is hot.

RADIATOR FAN

WARNING: Keep hands away from radiator fan. Fan is controlled by a

thermostatic switch which may come on or run for up to 15 minutes even after engine is turned off.

TURBOCHARGED MODELS

CAUTION: Do not race engine immediately after starting. When stopping engine, allow engine to idle for approximately 60 seconds before shutting it off. Failure to do so may cause turbocharger damage due to lack of oil flowing to the turbocharger bearings.

WHEELS & TIRES

Only wheels tested and approved by the manufacturer should be used on models equipped with Air Dam aerodynamic components.

SERVICE POINT LOCATIONS

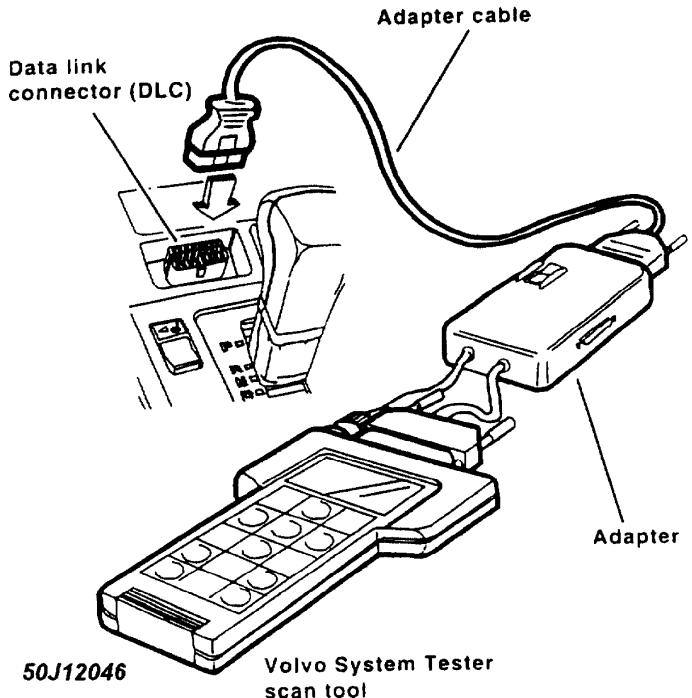

Engine compartment 850 Turbo (engine B 5234 T)

- 1 Expansion tank, coolant
- 2 Engine designation plate
- 3 Oil filler cap, engine
- 4 Clutch/brake system fluid reservoir
- 5 Fuse box
- 6 Washer fluid reservoir
- 7 Power steering fluid reservoir
- 8 Dipstick engine oil
- 9 Dipstick automatic transmission
- 10 Air cleaner
- 11 Battery
- 12 Data plate

6 7 8 9 10 11 12

Scan tool
Fig. 2: OBD II Diagnostic Link Connector Location (1996)
Courtesy of Volvo Cars of North America.

ALIGNING CAMSHAFT TIMING MARKS

93E01228 Fig. 3: Aligning Camshaft & Crankshaft Timing Marks Courtesy of Volvo Cars of North America.

Lubricating bushing

Remove:

- lever mounting screw
- tensioner pulley
- sleeve behind screw.

Lubricate surfaces of bushing, screw and sleeve with grease P/N 1161246-2 (50 grams) or 1161247-0 (500 grams).

Reinstail:

- sleeve
- tensioner pulley
- lever mounting screw.

Torque screw to 29 ± 5 ft lb = 39 ± 5 Nm.

Torques:

Pulley lever: 30 ft lb = 40 Nm ldler pulley: 18 ft lb = 25 Nm

Fig. 4: Lubricating Tensioner Pulley Bushing (Pivot Bearing)

Courtesy of Volvo Cars of North America.

 $\hbox{{\tt CAUTION:}} \ \, \hbox{{\tt Lubrication}} \ \, \hbox{{\tt of}} \ \, \hbox{{\tt the Tensioner Pulley Bushing is REQUIRED}} \ \, \hbox{{\tt on}} \\$

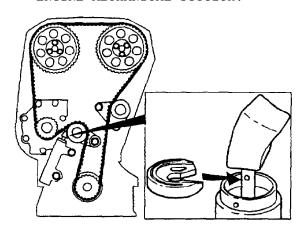

1993 Models, it is recommended that the bushing be checked

for free play and lubrication on 1994-95 models.

NOTE: For more information regarding camshaft timing belt service

refer to the 2.3L 5-CYL TURBO article in the

ENGINE MECHANICAL section.

Washer installation

Place new washer on piston stem of belt tensioner.

Check that washer centers on piston stem and tensioner case.

NOTE!

Make sure that correct side of washer is turned up. The countersunk side should face up. See illustration.

50111906

Fig. 5: Installing Washer on Timing Belt Tensioner Courtesy of Volvo Cars of North America.

MODEL 850 TIMING BELT REPLACEMENT TABLE

Model Year	Part Number	50K	60K	70K	80K	90K	100K
1993*	271952-4	Х					Х
1994-	271834-4			E			

- * = Late M/Y 93 850's (from engine no. 131035) should have M/Y 94 timing belt (p/n 271834-4). See Parts Bulletin 21-13 and Tech DCS 21-02.
- E = Recommended timing belt replacement
- X = Required timing belt replacement

NOTE: On 1993 850's, lubricate timing belt tensioner pivot bearing during timing belt replacement.

LUBRICATING AUXILIARY DRIVE BELT TENSIONER

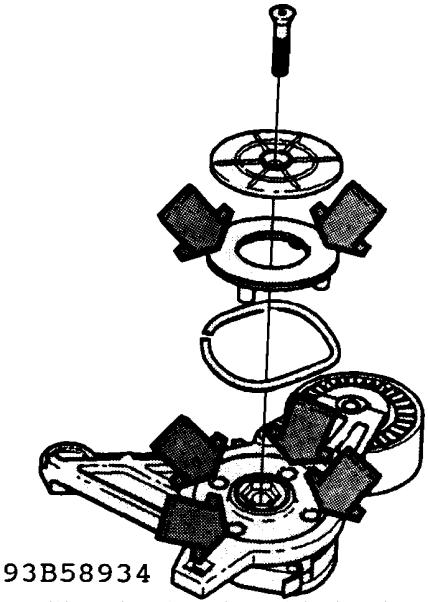

Fig. 6: Auxiliary Drive Belt Tensioner Lubrication Points Courtesy of Volvo Cars of North America.

NOTE: The automatic tensioner for the auxiliary drive belt must be greased every 30,000 miles (45,000 km) or if an abnormal

noise is heard from the tensioner.

NOTE: The auxiliary drive belt and automatic tensioner must be removed from engine in order to properly lubricate.

FLAME TRAP MAINTENANCE - PCV SYSTEM

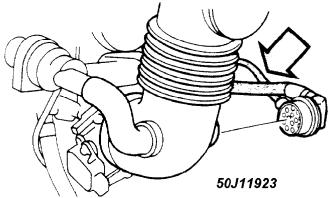

Fig. 7: Flame Trap Location Courtesy of Volvo Cars of North America.

Check flame trap

Remove flame trap by rotating it approx. 0.59 = 15 mm left (bayonet catch).

Blow clean hoses towards crankcase ventilation.

Important

Do not undo hoses from flame trap outer casing. Hose location may affect function of throttle control.

CHANGING CONTROL MODULE BOX FILTER (1993)

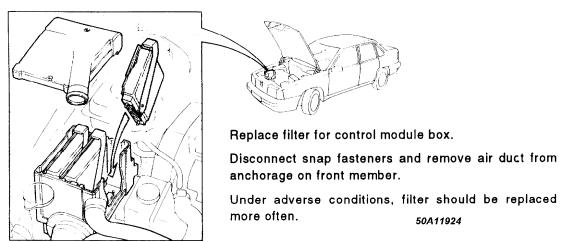

Fig. 8: Control Module Box Filter (1993) Courtesy of Volvo Cars of North America.

BODY LUBRICATION POINTS

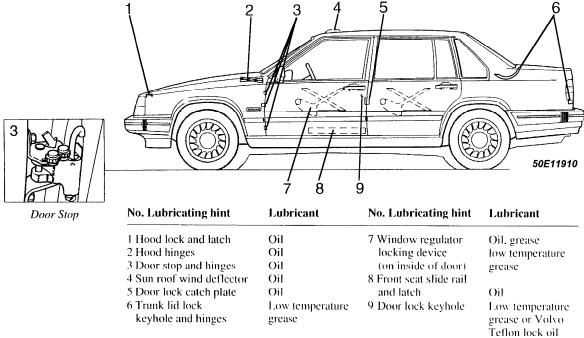

Fig. 9: Body Lubrication Points (Typical) Courtesy of Volvo Cars of North America.

VEHICLE LIFT POINTS

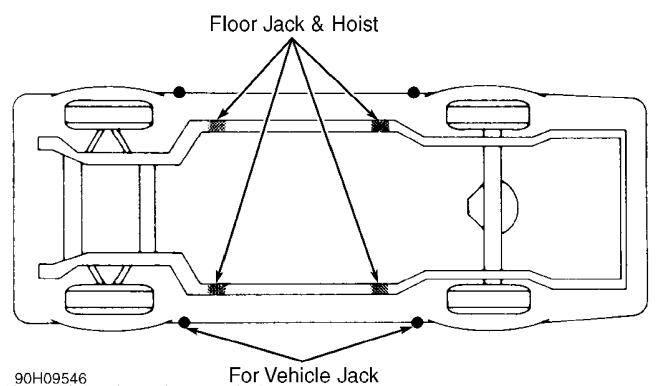

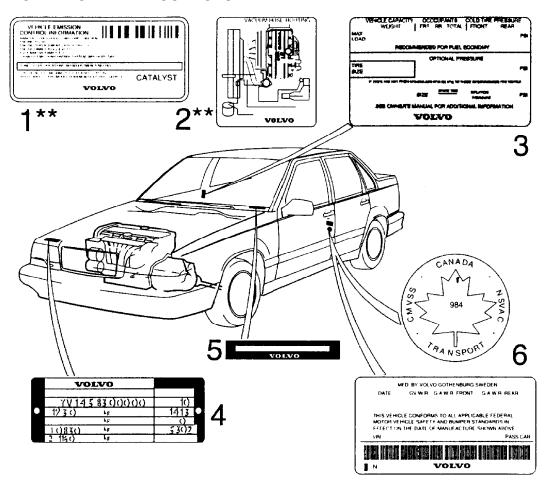

Fig. 10: Vehicle Lift Points (Typical) Courtesy of Volvo Cars of North America.

CAUTION: Use extreme caution when putting a T-5R model, or any model with a front spoiler and lowered suspension onto a lift.

NOTE:

For more information regarding lifting and hoisting refer to the JACKING & HOISTING article in the WHEEL ALIGNMENT section.

INFORMATION LABEL LOCATIONS

- 1 Vehicle Emission Control Information
- 2 Vacuum hose routing
- 3 Loads and Tire Pressures
- 4 Model plate

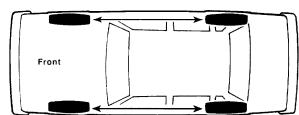

- Vehicle Identification Number (VIN) *
- 6 Federal Motor Vehicle Safety Standards (FMVSS) specifications (USA) and Ministry of Transport (CMVSS) standards (Canada)
- * The Vehicle Identification Number (VIN) should always be quoted in all correspondence concerning your vehicle with the dealer and when ordering parts.
- ** These decals are located on the underside of the hood.

50C11926

All specifications are subject to change without notice.

Fig. 11: Information Label Locations Courtesy of Volvo Cars of North America. Tighten all wheel lug nuts to 80 ft. lbs. (110 N.m) using pattern shown in $\;$ Fig. 12.

TIRE ROTATION PATTERNS

Tire rotation

- •Use rotation sequence shown in diagram.
- ●Tighten wheel bolt nuts to proper torque specification. 50J11915

Fig. 12: Tire Rotation Pattern & Lug Nut Torque Pattern Courtesy of Volvo Cars of North America.

CAMSHAFT TIMING BELT REPLACEMENT INFORMATION

CAUTION: Failure to replace a faulty camshaft timing belt may result in serious engine damage.

The condition of camshaft drive belts should always be checked on vehicles which have more than 50,000 miles. Although some manufacturers do not recommend belt replacement at a specified mileage, others require it at 60,000-100,000 miles. A camshaft drive belt failure may cause extensive damage to internal engine components on most engines, although some designs do not allow piston-to-valve contact. These designs are often called "Free Wheeling".

Many manufacturers changed their maintenance and warranty schedules in the mid-1980's to reflect timing belt inspection and/or replacement at 50,000-60,000 miles. Most service interval schedules in this manual reflect these changes.

Belts or components should be inspected and replaced if any of the following conditions exist:

- * Cracks Or Tears In Belt Surface
- * Missing, Damaged, Cracked Or Rounded Teeth
- * Oil Contamination
- * Damaged Or Faulty Tensioners
- ' Incorrect Tension Adjustment

CAMSHAFT TIMING BELT REPLACEMENT INTERVAL TABLE

Application	Interval	(Miles)
1993		,

SEVERE & NORMAL SERVICE DEFINITIONS

NOTE: Use the Severe Service schedule if the vehicle to be serviced is operated under ANY (one or more) of these conditions:

Service is recommended at mileage intervals based on vehicle operation. Service schedules are based on the following primary ${\sf Service}$

operating conditions:

Normal Service

- Driven More Than 10 Miles Daily
- * No Operating Conditions From Severe Service Schedule

Severe Service (Unique Driving Conditions)

- * Extended Idling Or Low Speed Operation* Frequent Short Trips Of Less Than 7 Miles* Extended Operation In Dusty Or Sandy Conditions
- Trailer Towing Operations
- * Driving In Mountainous Conditions

SEVERE SERVICE REQUIREMENTS (PERFORM W/SERVICE SCHEDULES)

NOTE:

The following services are to be performed on vehicles subjected to severe service. See SEVERE & NORMAL SERVICE DEFINITIONS. This service is to be performed in addition to the normal services listed in the NORMAL MAINTENANCE SERVICE SCHEDULES.

SEVERE SERVICE CONDITIONS/ACTIONS TABLE

Condition	Action	Item	Perform Every (1)
Extended Idling Or Low Speed Operation	Replace	Engine Oil & Filter	3,750 Miles or 3 Months
Frequent Short Trips Of Less Than 7 Miles	Replace	Engine Oil & Filter	3,750 Miles or 3 Months
Extended Operation In Dusty Or Sandy Conditions	Replace	Engine Oil & Filter	3,750 Miles or 3 Months
Trailer Towing Operations	Replace	Engine Oil & Filter	3,750 Miles or 3 Months
Driving In Mountainous Conditions	Replace	Engine Oil & Filter	3,750 Miles or 3 Months

(1) - Perform these services at the mileage or number of months (since the last time), whichever comes first.

Application Specification
Antifreeze/Engine Coolant Ethylene Glycol Antifreeze Automatic Transmission Dexron-IIE or Mercon Brake Fluid DOT 4 Brake Fluid Or Equivalent Power Steering Fluid Dexron-IIE or Mercon ATF Engine Oil Ambient Temperature
Less Than 68°F (20°C)
(1) - DO NOT use Dexron fluid in manual transmissions.
Fluid Capacities
Application (1) Quantity
Automatic Transmission
Non-Turbo (Includes Oil Filter) (2) 5.6 Qts. (5.3L) Turbo (Includes Oil Filter) (2) (3) 6.3 Qts. (6.2L) Manual Transmission 2.5 Qts. (2.1L)
(1) - Capacities are recommended or calculated levels. Always use dipstick (if available) to measure level.
(2) - DO NOT use SAE 15W/40 oil in extremely low ambient temperatures. (3) - Turbo includes 0.95 Qts. (0.9L) for Oil Cooler.
